

International Program in Emergency Ultrasound

The International Program in Emergency Ultrasound trains colleagues around the world to become the best emergency sonographer educators they can be. Our tuition-based immersive program ranges from 4 weeks to one year and is adapted to meet the specific needs of the learner. We have a defined curriculum consisting of didactic, research, and emergency ultrasound education.

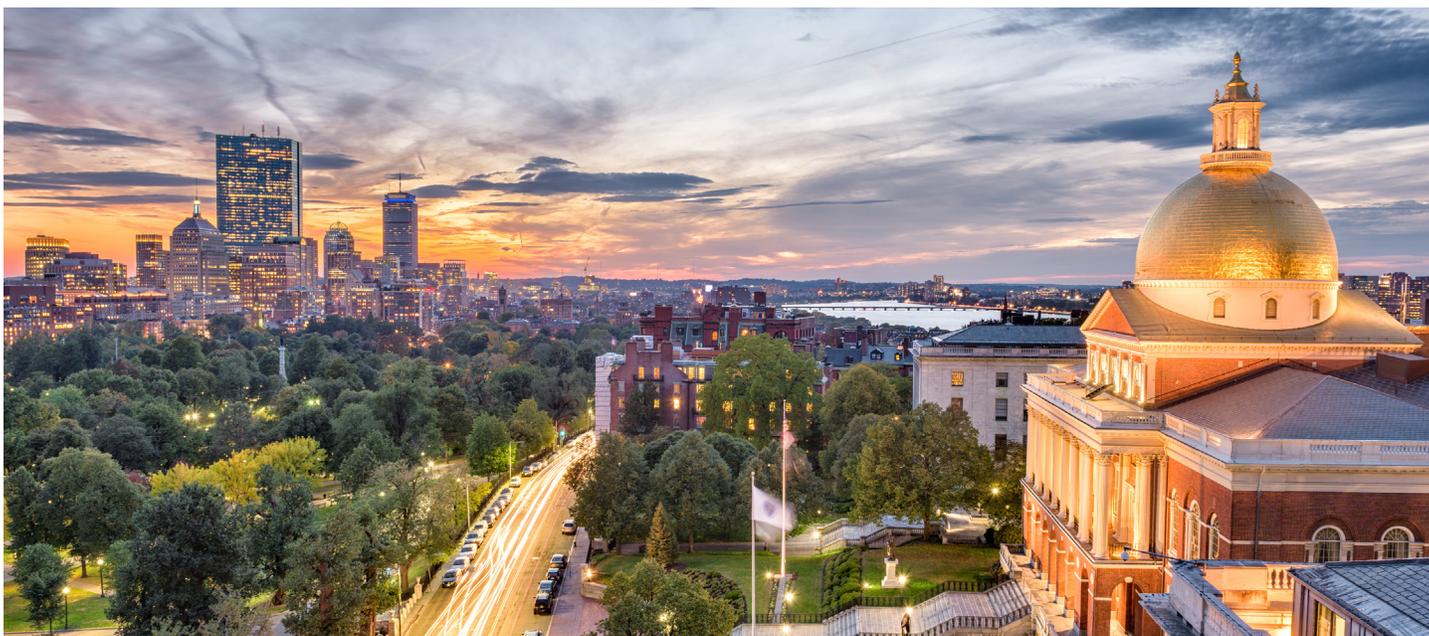

Our curriculum is designed to offer International Scholars a breadth of educational opportunities encompassing didactics, research, simulation, concepts proper clinical integration, and ultrasound administration. To provide the most optimal experience, we leverage the breadth and scope of educational opportunities within the Bright and Women's Hospital to meet our scholar's goals.

Scholars are encouraged to create and present their projects and to teach ultrasound skills to others throughout their program experience. We intend to enable international scholars to graduate from our program with the skills needed to be ultrasound leaders in their respective practice settings.

Core Curriculum

The International Program in Emergency Ultrasound has a broad focus that allows our scholars to gain an understanding of research methodology, education, and various components of emergency ultrasound.

Our core topics include echocardiography, thoracic, E-FAST, ultrasound-guided procedures, biliary, pregnancy, and ultrasound physics. We also provide education on curriculum development, ultrasound business management as well as course management. Scholars will also have the opportunity to work with faculty on specific area(s) of interest as well.

Prospective Candidates

The program is designed primarily for physicians from outside North America who currently hold or are interested in pursuing a future leadership role in an Emergency Department.

How to Apply

To apply, please submit the following documents to **info@iedli.org**:

- Three letters of recommendation from clinical supervisors
- Curriculum Vitae
- Personal Statement describing your motivations for wanting to pursue advanced training in emergency ultrasound

Applications are accepted throughout the year. Program start dates are flexible.
